Vonti on Lonza Group AG (the "Securities") made under the Issuance Programme of June 1, 2019 and subject to the term sheet (final terms) of May 08, 2020 (the "First Final Terms") including supplements (where any) after expiry of the issuance programme (the "Issuance Programme") - (the "Resumption of Offer"). These Final Terms are a key factor in the Resumption of Offer. The terms and conditions contained in the First Final Terms are not relevant to the Resumption of Offer. The Resumption of Offer commences at the date of these Final Terms.

The Issuance Programme, the First Final Terms and any notices published since the issue of Securities under the terms and conditions of the First Final Terms are available on the issuer's website at <https://derinet.vontobel.com> and if required hard copies can be obtained free of charge by contacting the issuer at its address.

I. Introduction

These Final Terms have been prepared in accordance with article 45(3) of the Federal Financial Services Act (FinSA). Please read the entire Prospectus for all relevant information on the Issuer, Guarantor and the Securities offer. The entire Prospectus comprises these Final Terms and the Base Prospectus of November 20, 2020 (the "Base Prospectus") including supplements, if any, pursuant to article 56 FinSA (the "Supplements"). In accordance with article 64 FinSA, the Base Prospectus and any Supplements thereto are published electronically at <https://derinet.vontobel.com> and hard copies can be obtained free of charge from the Issuer's address. A product-specific summary is attached to the Final Terms (see II below).

Pursuant to article 55 FinSA, the Base Prospectus is valid until November 19, 2021. **We have no duty to issue any supplement in the event of significant new circumstances, material errors or inaccuracies after expiry of the Base Prospectus.**

After expiry of the Base Prospectus, the public offer will continue on the basis of one or more subsequent Base Prospectuses (being each a "Subsequent Base Prospectus") until the end of the public offer, if the relevant Subsequent Base Prospectus envisages the continuation of the public offer of Securities. In that case, the present Final Terms must be read together with the most recent Subsequent Base Prospectus. The relevant Subsequent Base Prospectus will be approved and published before the previous Base Prospectus expires. The relevant Subsequent Base Prospectus will be published electronically at <https://derinet.vontobel.com> and if required hard copies can be obtained free of charge by contacting the Issuer at its address.

II. Summary

This summary constitutes an introduction to the Prospectus. Investment decisions must not be based on the introduction but on the information contained in the entire Prospectus. Prospects of Profit and Losses

Any possible gain results from the guaranteed fixed coupon. Nevertheless, there is an upper limit to the gain, as the maximum payment is the Nominal Value plus the coupon.

These products have no capital protection. Accordingly, the risks are considerable; given upwardly limited chances of gains, they correspond largely to the risks of a direct investment in the Underlying. If the Strike Price is above 100%, the risk increases proportionally (in the ratio of Strike price to Spot Reference Price). The lower the closing price of the Underlying at maturity is, the greater the losses sustained. Apart from the coupon payments, in extreme cases, the maximum loss can lead to a loss of the capital invested.

Even if the performance of the Underlying is positive the price of the product during the term can be considerably below the Issue Price. Potential investors should bear in mind that price changes to the Underlying, as well as other influencing factors, may have a negative effect on the value of structured products.

Assumptions and limitations in preparing the market scenarios

The following market scenarios should afford the investor a simplified way of making an assessment of the significant factors that influence the investment performance of the certificate. For a precise analysis of the profit and loss scenarios, reference must be made to the formulas and definitions set out in this termsheet, (e.g. for "reimbursement"), because these scenarios have been deliberately simplified in order to make them better understandable. With the exception of those certificates for which one of the following factors is defined as the underlying (e.g. a currency certificate or a certificate of interest), the impact of these risk factors will be excluded from the simplified presentation of the scenario

- Foreign currency risks
- Interest rate risks
- Volatility risks
- Issuer risk
- Reference bond ("default or redemption event")
- Fees and costs both stemming from the certificate and for the acquisition and holding of the certificate

Market scenarios

Maximum gain:	Cap at coupon
Maximum loss:	100%
POSITIVE SCENARIO	
Indicative performance of the certificate:	0% to coupon
Necessary market performance of Underlying:	- If the Strike Price is reached, the performance corresponds to the Coupon - If the Strike Price was reached, but the price loss in reference to the Strike Price of the relevant Underlying is smaller than the Coupon multiplied by the Strike Price in %, then the performance lies between 0% and the Coupon - Performance is limited to the Coupon (Cap)
BREAK EVEN	
Indicative performance of the certificate:	0%
Necessary market performance of Underlying:	- The price loss in reference to the Strike Price of the relevant Underlying corresponds to the Coupon multiplied by the Strike Price in %
NEGATIVE SCENARIO	
Indicative performance of the certificate:	Loss of up to 100% possible
Necessary market performance of Underlying:	- The price loss in reference to the Strike Price of the relevant underlying is higher than the coupon multiplied by the exercise price in %

Significant Risks for Investors

Currency risks

If the Underlying or Underlyings is/are denominated in a currency other than the product's Reference Currency, investors should bear in mind that this may involve risks due to fluctuating exchange rates and that the risk of loss does not only depend on the performance of the Underlying(s) but also on any unfavourable performance of the other currency or currencies. This does not apply for currency-hedged products (quanto structure).

Market risks

The general market performance of securities is dependent in particular on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries (so-called market risk). Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the Underlying(s) or the Structured Product.

Disruption risks

There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective Underlyings and/or their stock exchanges or markets taking place during the term or upon maturity of the Structured Products. Such occurrences can have an effect on the time of redemption and/or on the value of the Structured Products.

In the event of trading restrictions, sanctions and similar occurrences, the Issuer is entitled, for the purpose of calculating the value of the Structured Product, to include at its own discretion the Underlying instruments at their most recently traded price, at a fair value to be established at its sole discretion or indeed as worthless, and/or additionally to suspend pricing in the Structured Product or liquidate the Structured Product prematurely.

Secondary market risks

Under normal market conditions, the Issuer or the Lead Manager intend to post bid- and ask-prices on a regular basis. However, neither the Issuer nor the Lead Manager is under any obligation with respect to investors to provide such bid- and ask-prices for specific order or securities volumes, and there is no guarantee of a specific liquidity or of a specific spread (i.e. the difference between bid- and ask-prices), for which reason investors cannot rely on being able to purchase or sell the Structured Products on a specific date or at a specific price.

Issuer risk

The value of Structured Products may depend not only on the performance of the Underlying(s), but also on the creditworthiness of the Issuer and the Guarantor, which may change during the term of the Structured Product. The investor is exposed to the risk of default of the Issuer and the Guarantor. For further information on the rating of Bank Vontobel AG or Vontobel Holding AG, please see the Issuance Program.

Risks associated with the Sustainability of the Product

A prospective investor should independently assess the information in relation to the sustainability of the Product and determine whether an investment in the product meets the investor's objectives and expectations or any investment guidelines applicable to the investor with respect to a sustainable investment. Vontobel Group (including the Issuer) makes no representation that the Product currently or in the future will meet the investor's objectives and expectations or any investment guidelines applicable to the investor with respect to a sustainable investment. In particular, the classification of a Product as "sustainable" may change during the life of the Product, for example when the Underlying of the Product no longer meets the sustainability requirements set. This is usually reviewed on a monthly basis. In case of a change, the classification of the Product on the website www.derinet.com will be updated.

Risks relating to potential conflicts of interest

There may be conflicts of interest at the Vontobel Group companies that could have a negative impact on the value of the Structured Products. For example, Vontobel Group companies may enter into or participate in trading and hedging transactions relating to the Underlying. They may also perform other functions relating to the Structured Products (e.g. as Calculation Agent, Index Sponsor and/or Market Maker) which enable them to determine the composition of the Underlying or calculate its value. Vontobel Group companies may also receive non-public information relating to the Underlying. It should also be noted that the payment of distribution fees and other commissions to financial intermediaries could result in conflicts of interest to the detriment of the investor, as this could create an incentive for the financial intermediary to distribute products with a higher commission preferentially to its clients. As market maker, Vontobel Group companies can determine the price of Structured Products themselves to a large extent and determine it on the basis of various factors and earnings considerations.

Please also note the further, detailed description of potential conflicts of interest and their impact on the value of the Structured Products as contained in the Issuance Program.
