## 1. What is your age range?

19 responses

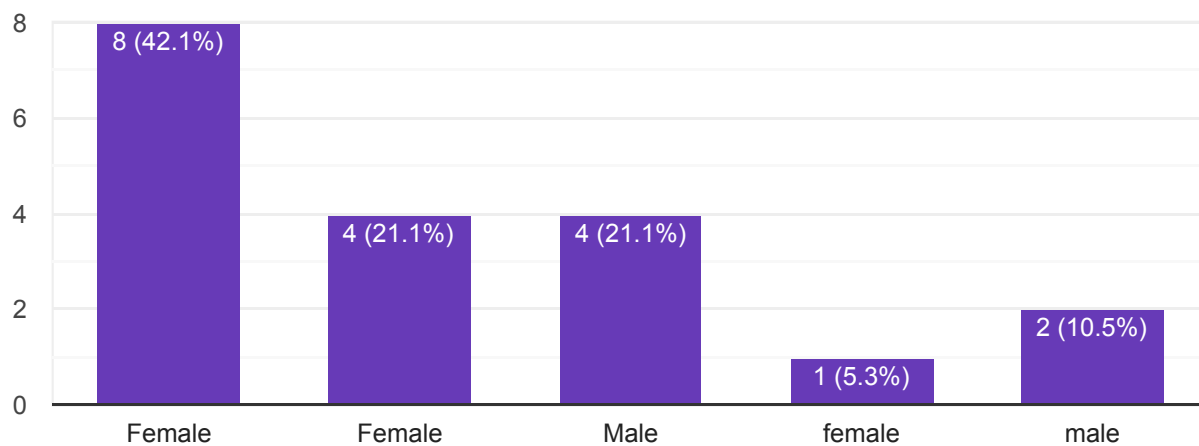

## 2. Race/ Ethnicity

19 responses

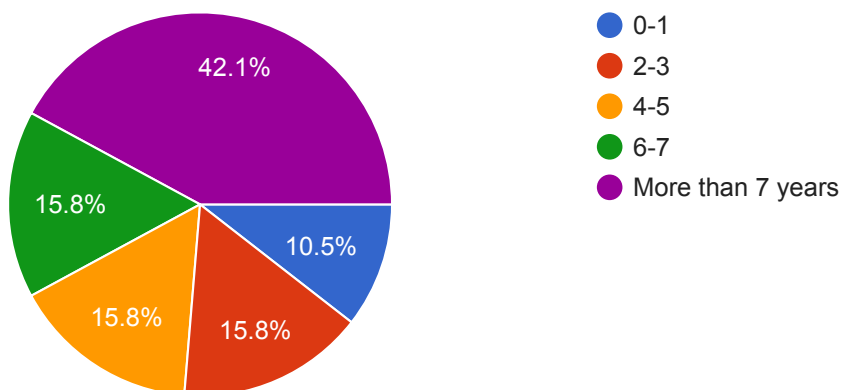

## 3. Gender

19 responses

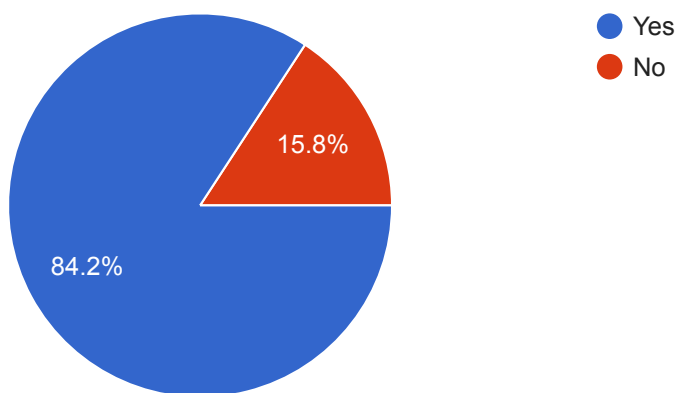

#### 4. How many years has it been since you received your bachelors?

19 responses

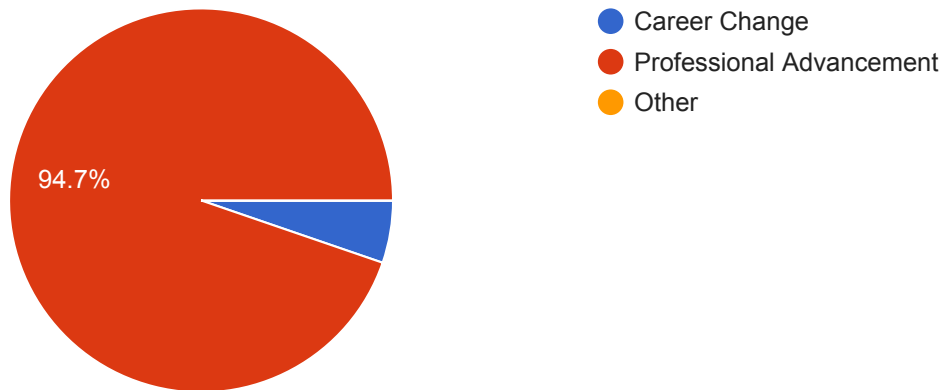

#### 5. Is this your first online degree?

19 responses

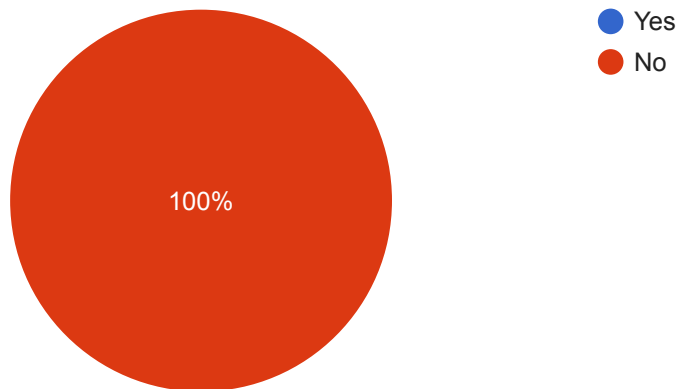

## 6. What is the purpose of your online schooling?

19 responses

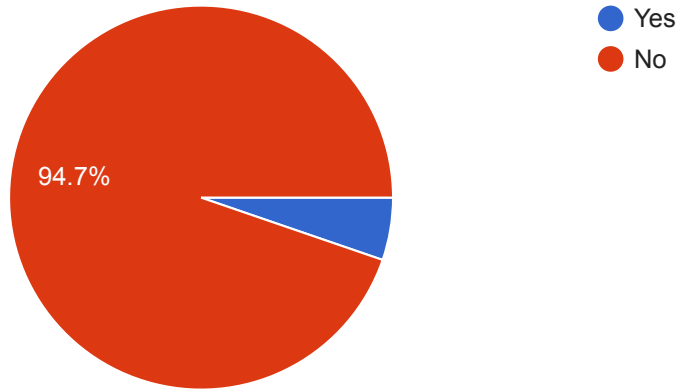

## 7. Has the costs of textbooks influenced the number of classes taken per module/ semester?

19 responses

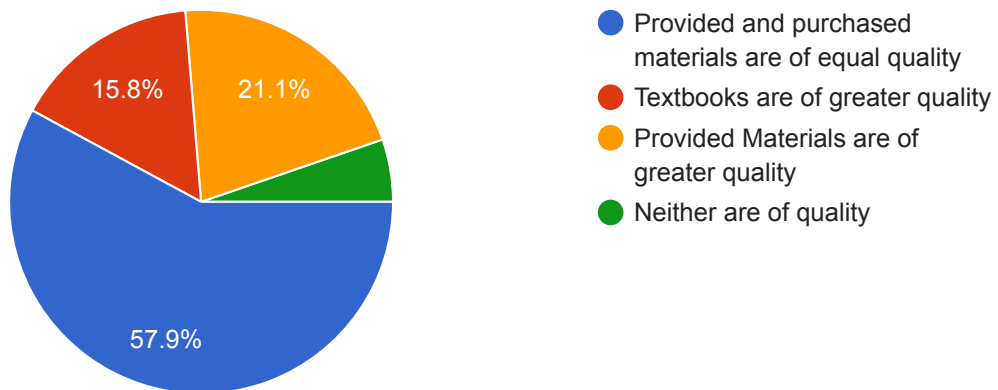

8. Have you received tuition assistance from your employer for your online degree?

19 responses

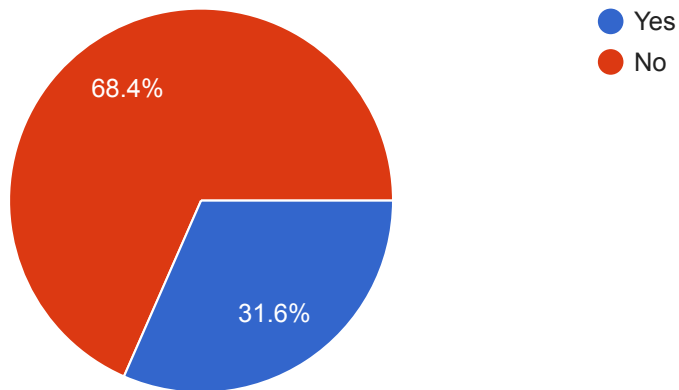

9. Have you found the provided materials (articles, videos, etc.) in courses are of equal or less quality than any purchased textbooks?

19 responses

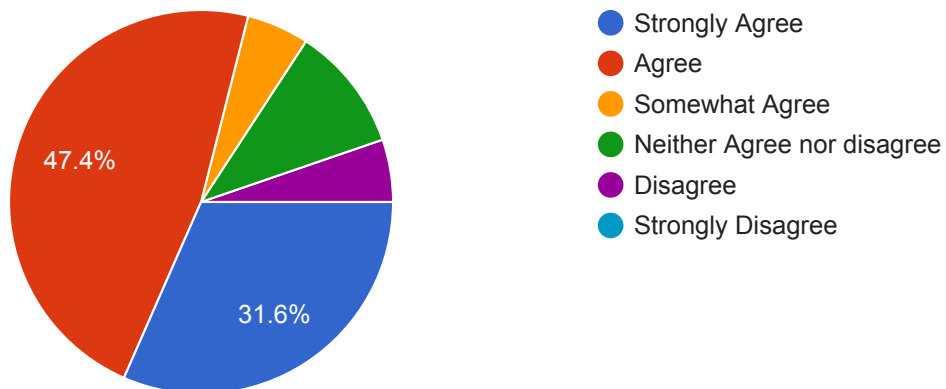

10. Did you have to purchase any additional materials in order to attend online school (new computer, additional internet, etc.)?

19 responses

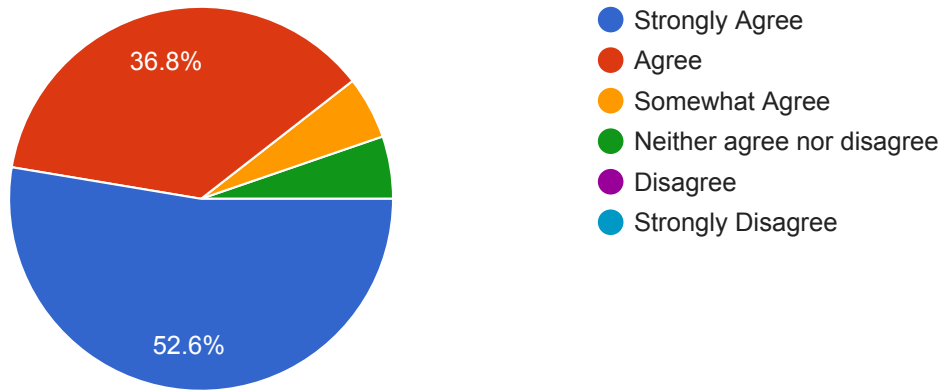

11. Communication with your professor has been adequate to your standard? (Communication can be weekly checklists, accessibility of emailing/ calling, etc.)

19 responses

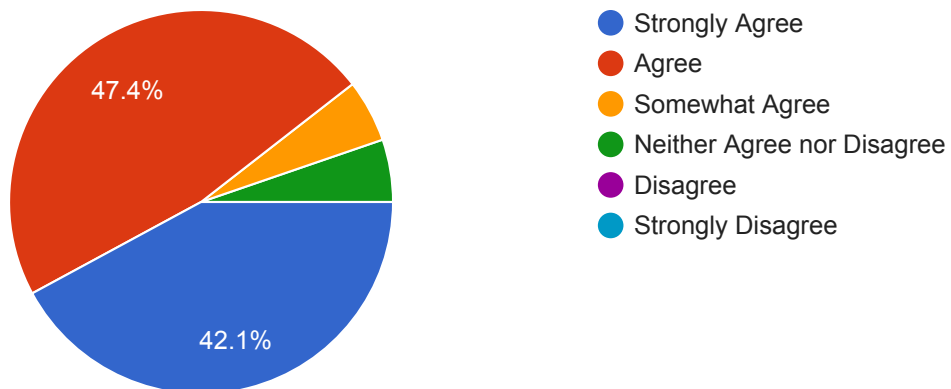

12. Accessibility of materials in courses have been easily attainable. (Easy to read, use of immersive reader when needed, text to speech when needed, etc.)

19 responses

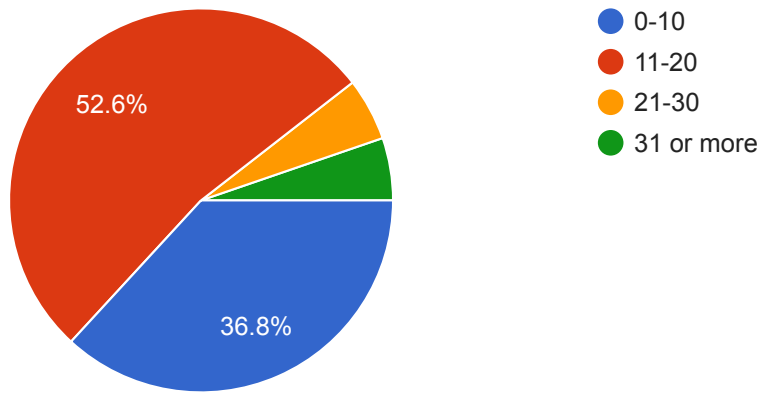

13. My online education has been culturally responsive. (you feel as those the materials are relevant and representative of you as an individual)?

19 responses

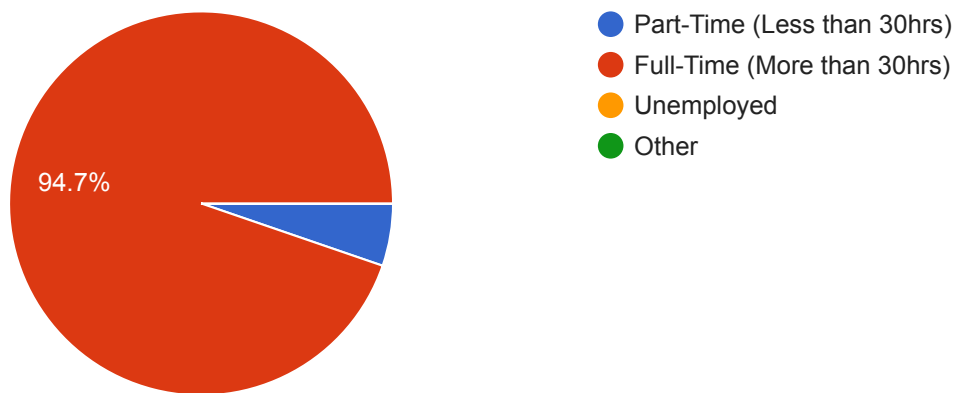

#### 14. How many hours do you spend on coursework per week?

19 responses

#### 15. How many professional working hours do you complete per week?

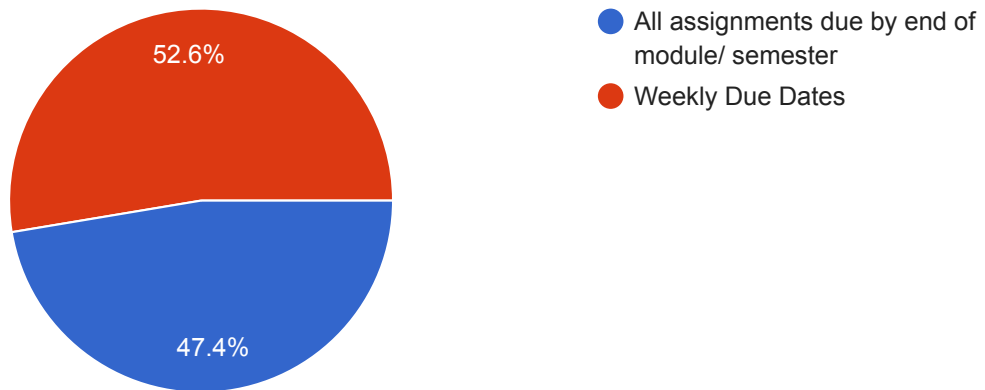

19 responses

16. Do you prefer your online classes to have one open deadline for assignments or weekly structured deadlines?

19 responses

17. What would you say your greatest challenge has been while taking an online degree program?

19 responses

The additional work on top of my career

Completing multiple assignments simultaneously

Time, time management, lack of support system/people to talk to who are in the same program

balancing life between work, school, and family responsibilities.

The idea of what lecturing , or providing lectures actually means for professors. Coming from an on-campus undergrad / partial graduate program, lectures provided great insight into the texts and weekly module topics and concepts. To me lectures were a safety blanket for learning to ensure I was comprehending course content. I think that the use of discussions doesn't suffice for the content we are learning, given the size of term. To support my learning style the lack of lectures has been a detriment, it feels as though I'm teaching myself.

Balancing professional workload with online coursework
