

Assignment #2: Dashboard Improvement

Objective

You are required to improve an existing dashboard and enhance it from YOUR perspective. For example, you can change the chart type, colors, fonts, size of individual charts, placement of various visualizations, or add an annotation.

Every user has his/her own view about a dashboard's appearance and layout. Use this exercise to display your preferences. However, when making changes, keep in mind the best practices that you have learned through the lectures.

Requirement

A dashboard, *E13.twbx*, has been uploaded under Assignment #2.

Improve this dashboard from a layout, look/feel, and best practices perspective.

How to submit

Upload only one file--the improved workbook, after renaming it using the file naming convention (specified in the next section).
